GOVERNMENT OF HIMACHAL PRADESH

AGRICULTURE DEPARTMENT

NOTIFICATION

Simla-171002, the 21st December, 1974

No. 11-3/69-Agr.(Sectt).—In exercise of the powers conferred by section 3 of the Essential Commodities Act, 1955 (10 of 1955), the Governor, Himachal Pradesh, is pleased to order that Annexure 'I' appended to the Himachal Pradesh high quality cauliflower seed production notification of even number, dated the 13th February, 1974, shall be substituted by the revised Annexure 'I' attached hereto.

REVISED ANNEXURE 'I'

Cauliflower is a cross-pollinated crop. In order to produce high quality true-to-type seed it is, therefore, necessary to adopt the following precautions:—

1. *Isolation.*—(a) Cauliflower seed crop should be isolated by 1 kilometre distance (crow flight) from other varieties of cauliflower and member of cole crops, such as cabbage, knolkhol brussels sprout, kale, karam sag, etc. grown for seed production.

(b) Seed of only those varieties of cauliflower may be raised in different zones which are notified by the Director of Agriculture, Himachal Pradesh, Simla from time to time who will also notify the agencies for maintaining foundation seeds stocks, laying out field and seed standards and to do the inspection and certification. Any other variety except the one notified will not be grown for seed production in the specific zone.

(c) The word 'zones' as above will mean the areas notified for cauliflower seed production of a particular notified variety.

2. *Rouging.*—(a) When the curds are formed, some plants do not form curds and thereby directly bolt. Again there may be plants which do not come upto the prescribed standard of purity of the variety. These plants are termed as off-types and/or sub-standard. Such plants should be uprooted. The plants left for seed production should be true-to-type, form compact snow white curds and free from seed borne diseases.

(b) Plants considered as off-type or sub-standard by the inspecting staff will have to be uprooted by the cultivator and not left in the field to flower. A crop rejected as not true-to-type or sub-standard by the inspection staff, will be uprooted by the cultivator and not allowed to flower and set seed in the field.

(c) In case the concerned cultivator does not uproot the crop or the part thereof, it will be uprooted through court at his expenses. The cultivator shall not be entitled to claim any compensation for the uprooted crop.

3. To maintain uniform field and seed standards, all cauliflower seed crops grown in Himachal Pradesh, will be got inspected and rogued by an inspecting agency to be named by the Director of Agriculture, Department of Agriculture, Himachal Pradesh or his authorised agents.

4. The inspecting staff referred to in the above paras will mean the staff of agency deputed, for the purpose of roguing and certification by the Department of Agriculture, Himachal Pradesh, or by the agencies who have been duly authorised by the Director of Agriculture, Himachal Pradesh.

5. *Spraying the crops against pests and diseases.*—Cabbage butterfly caterpillars and aphids are two serious insect pests of cauliflower. It is, therefore, necessary to spray the crop at a reasonable interval of 7-10 days to maintain the health standards of the crop for the production of quality seed.
